Guidance for Use Case Template

Document each use case using the template shown in the Appendix. This section provides a description of each section in the use case template.

1. Use Case Identification

1.1. Use Case ID

1.0

1.2. Use Case Name

View MBTI Gamer profile

1.3. Use Case History

1.3.1 Created By

Zheng Ting, Joshua, Minh, Marcus, Jun Hong

1.3.2 Date Created

3rd Sept 2026

1.3.3 Last Updated By

Joshua

1.3.4 Date Last Updated

3rd Sept 2026

2. Use Case Definition

2.1. Actor

Gamers, RAWG.IO API, Game platform

2.2. Description

Gamers interact with the MBTI UI to view their personality-based gamer profile. The platform then matches gamers with similar personalities to play together. The platform then matches gamers with similar personalities to play together. The platform also recommends gamers with different games of the same genre that match their personality type.

2.3. Preconditions

1. Gamer has an account registered on the platform.
2. Gamer has completed the MBTI assessment.

3. Gamer's stat and history has been collected by the system

2.4. Postconditions

1. Gamer can view their tailored MBTI insights
2. System is able to log in interaction for future pairing and recommendations.

2.5. Priority

High

2.6. Frequency of Use

High (Every time a gamer accesses their profile dashboard)

2.7. Flow of Events

- Gamer logs in to website
- Gamer requests to view the MBTI profile
- System retrieves the Gamer's MBTI profile, gamer's stats and play history
- System displays a custom MBTI title
- System shows a chart that breaks down the Gamer's specific trait
- System randomly displays fun facts relating to the MBTI type to the gaming habits.
- System displays a list of famous people or esports players who share the same personality type as Gamer
- System presents a curated list of similar genre games as recommendations

2.8. Alternative Flows

1.0 AC.1 Incomplete MBTI profile.

- After step 2, System detects Gamer has not finished MBTI profile
- System prompts Gamer to take the MBTI assessment
- Gamer completes the assessment
- Flow resumes after step 2.

1.0 AC.2 Addiction detection

- System will track game time in the background
- After an extended prolonged period time, System will detect that Gamer has been playing for too long
- System will send a ping to remind Gamer that they have spent too long on games and recommend that they should take a break

2.9. Exceptions

1.0 EX.1 No Similar Famous players found

- System will broaden search to show famous gamers with the same MBTI, regardless of the game they play

2.10. Includes

- View famous players
- View fun facts
- View MBTI titles
- Log in

2.11. Special Requirements

None

2.12. Assumptions

It is assumed that the gamer has played enough games for the system to generate relevant "fun facts" and stats.

2.13. Notes and Issues

Nil
